

MOUNTAIN VIEW CORRIDOR PROJECT OVERVIEW

INITIAL CONSTRUCTION

FULL FREEWAY BUILD OUT

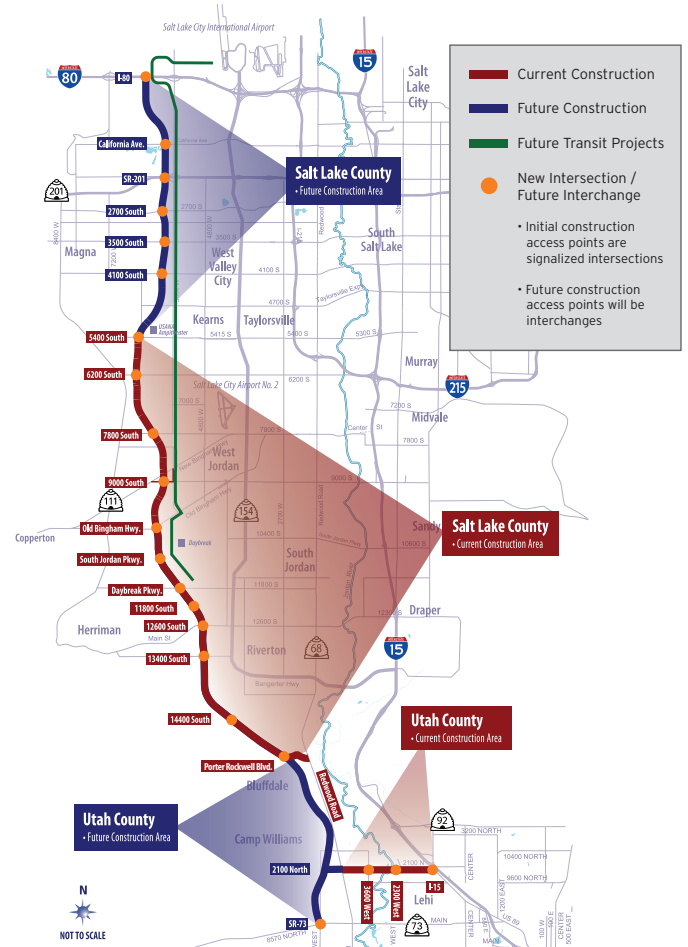

ABOUT THE MOUNTAIN VIEW CORRIDOR

The Mountain View Corridor (MVC) is a planned freeway, transit and trail system in western Salt Lake and northwestern Utah counties, servicing 13 municipalities in the project area.

The MVC will have phased implementation by building infrastructure for initial needs and gradually expanding systems over time. This phased approach is part of the overall MVC plan to address short-term regional transportation needs while providing a long-term solution for the future.

Initial construction includes building two outside lanes in each direction with signalized intersections where future interchanges will be located. Trail sections will also be built. Future construction will build out the remainder of the corridor by adding interchanges and inside lanes to achieve a fully functional freeway.

When finished, MVC will extend 35 miles from I-80 in Salt Lake County to I-15 in Lehi in Utah County. Initial construction in Salt Lake County includes 15 miles of new roadway from 5400 South to Redwood Road (at approximately 16000 South), with anticipated completion by the end of 2012. Initial construction in Utah County includes three miles of roadway along 2100 North from Redwood Road to I-15, with anticipated completion by fall 2011.
